The Open Road

Barney, Kim, Lori, and I met with Mike Deetsch at the Toledo Museum of Art to discuss the Porsche car show to be held in conjunction with the Life is a Highway: Car Culture in America exhibition. The date chosen for the show is June 15, 2019. We discussed that this will be a multi event weekend and will include more than the car show. Lori is designating our event as a Zone 4 weekend for 2019. The museum is very supportive of our needs and wants this to be a success. Many great ideas were discussed and we will be having a discussion about the events for that weekend at the planning meeting. If you are interested in helping in any way, please let me know.

Greg Herr, a long time member of PCA and one of our DE instructors is featured in a story by Mark Schoenlein. Greg has been mentoring a group of students at Penta Career Center as they build and then drive a car. It is great to see how our members are out helping the community.

We had an exciting drive to Port Clinton last month. While on the way to our scheduled venue for

lunch, it was discovered that they were closed due to high water. Kudos to the social committee for coming up with an alternative location while traveling. The event turned out to be a success because of their great work.

The region was hosted by Jeff Snook at his Snook's Dream Car Museum at the end of the month. Many of the members turned out to view his collection of cars and memorabilia.

The next event will be the planning meeting and color tour hosted by Ruth Gulliford and Jeff and Stacey Fort. In November we will have two events with the tour of the Ford Rouge plant on the 10th and our annual holiday party on the 30th.

One final note is a reminder that the club is "fueled by volunteers." We are always looking for help in planning or staging our events, or running the region. If you can support in any way, let Barney or one of the other officers know. Your help will be greatly appreciated.

.....the editor

From The Left Lane

By Barney Stewart

Hello MVR;

The PCA National guidelines call for each region to hold quarterly business meetings. We have a fifth meeting scheduled for October 15th due to a few late 2018 unsettled issues. The most urgent might just be filling the positions that will become vacant this coming January 1st. We have an awesome car club that I believe is unparalleled. The events our social committee plans and executes are popular, diverse, and just plain fun. MVR's member participation numbers are high and would compare favorably, percentage wise, vs any other region. How does all this happen, well its members just like you that have volunteered their time and energy, in accepting positions for terms as short as 2 years. I have no doubt that every MVR member, has something to bring to the table. We are presently in need of a President, Vice President, Membership Chair, and Board members. We all benefit from our club, please consider volunteering for one of the positions that will be opening up. No special qualifications are required, just be a member in good standing. Call or send me a note, if you would like to discuss the available opportunities.

A few years ago Beth and I decided to take a vacation with the objective of visiting several of our National Parks. We started a list that

included the Grand Canyon,

Yellowstone, and Yosemite, all very well known National Parks. We wanted to see what other parks we might add to our list, so we did a search and found the United States has 60 protected areas known as National Parks. The vast majority of our National Parks are found west of the Mississippi. But the most surprising thing we found (to us) was that Ohio indeed has a National Park: "Cuyahoga Valley". Located between Cleveland and Akron it's easily accessed off the I-80 turnpike exit 173, Interstates I-77 exits 145 & 149, or I-271 exit 12. On a recent sunny autumn day, Beth and I spent a get acquainted day at the Park. Once in the park you have access to 125 miles of trails ranging from 0.25 to 19.5 miles. Brandywine Falls is a must see along with the 1.4 mile, Gorge loop trail. The Cuyahoga Valley Scenic railroad runs through the Park and offers seasonal rides. The Historic Ohio & Erie Canal that linked Lake Erie with The Ohio River, also runs through the park. The old canal towpath is available as a bike trail. Bird watching, yoga, guided hikes, concerts and much more await Park visitors. You might want to add a visit to Ohio's National Park, to your must see list.

Take care,

Barney.

Greg Herr Story

by Mark Schoenlein

I wanted to recognize a fellow PCA member for his assistance with a new applied technology hands on activity at Penta Career Center (Vocational HS). I had met Greg Herr via a mutual work friend who had also been a PCA member. I was able to get to know Greg at the PCA driving event over at the Owens CC crash pad a couple of years ago and later hung out with him when he raced at the MidOhio Vintage for a couple of years. So it made sense to ask Greg to join our advisory committee when starting the Formula Student race car program about 18 months ago.

Approximately 70 Junior and Senior students from the Auto Tech, Collision Repair, Powersports, Welding, CAD, and Advanced Manufacturing programs worked to build 2 open wheel FS race cars powered by Honda 18 HP motors from scratch during the 2017-18 school year. The premise of the program is if they work on the cars they get to drive the cars when finished. Some students had never driven so much as a lawn mower.

Greg is an engineer who relates well with the students and the school staff. On occasion we would leave work and go visit the students during build time to check on progress. As I mentioned some students had little to no driving experience so Greg assembled a presentation on the basics of driving a race car and we did 2 training classes before and after

their lunch time during a school day. Greg had his steering wheel and toy Porsche props to help illustrate technique. Later when it became apparent that the cars would not be ready for practice driving Greg and another coworker took the students individually on a cone course set up in the school parking lot using the school maintenance Kabota utility vehicles.

Greg was not able to attend our competition outing in New Castle, IN in May because he was racing on that weekend. The 19 students that went did surprisingly well and it was apparent that they had heard and put into practice the guidance that Greg had provided. One of newbie drivers set the fastest lap of all of the sessions and many of the students worked throughout the 2 days on improving their driving technique. Unfortunately one of the students who worked on the cars is wheelchair bound and the hand control concept that was developed by the students did not work well enough to allow him to brake safely. After our return Greg proposed a hand brake/accelerator lever concept which the instructors were able to fabricate and install. The cars were taken to the kart track in Fremont in June where the Junior student was able to get himself into the car in the presence of his father drive a couple sessions on track. It was a really great moment.

Greg's involvement with the program lead to a much better outcome than any of us had expected for a startup program. His experience was invaluable. To me he represents the professionalism that I see in the PCA organization. We could not have done it without him.

Brain Teaser Challenge

Curated by Sarah Mierzwiak

Answers must be submitted by the first of the following month – please submit one answer per person, per month, and be sure to explain your conclusions. Don't forget to tell us your name when you submit! Each month's answer will be published along with the next month's teaser. Submit your answers to: MVRTeaser@gmail.com.

Ron and Sharon Gargas are long-time MVR PCA members and equally long-time world travelers. This year, they took a bucket list trip to Germany – attending the PCA Fall Treffen tour. Highlights of this event included exclusive tours of the Porsche Museum, Porsche Factory, and Zen-trum dealership in Zuffenhausen; a 7-day Porsche rental, “hot laps” on the Weissach Test Track, driving on the no-speed-limit Autobahn, and accommodations in 5-star hotels serving the finest meals, wine, and champagne. Ron and Sharon are both great competitive drivers, enjoying the Weissach hot laps and Autobahn excursion immensely; and the

Porsche Panamera GTS rental car performed flawlessly! Being very particular about the beautiful vehicle they rented for the trip - after each event Ron made sure to have the car exterior cleaned and prepped for the next day.

At the end of the week, on the drive to return the car to the dealership, Ron noticed there was pulsing in his brake pedal. He mentioned this to the dealership mechanic, who found the front disc brake rotors were indeed warped. Knowing the Panamera brakes were perfect when Ron first rented the car, what happened in one week to cause the rotors to warp?

Answer for last months challenge: This is a pretty easy one... assuming two things: Barney and Mike's skill are identical, and Barney turns off the air conditioning; because Barney has the convertible top and windows up, the better aerodynamics generated, due of a lower drag coefficient, will ensure Barney and Beth win!

Around the Zone

By Lori Schutz, Zone 4 Representative

As our summer winds down, the driving events just keep on keepin' on. Several of our members participated in the Club Race at Road America, hosted by the PCA Chicago Region over Labor Day, some had picnics and tours.

I was in Indy at my nephews wedding – No I didn't pick the date!

I traveled south to join the Michiana Region President, Murray Bartel and his wife Penny, for the Friday Drive to Warsaw event on September 7th. We had over a dozen cars, despite the misty weather, and enjoyed local musicians and a wonderful dinner. Several folks drove over from Ft Wayne area Central Indiana Region to join in the festivities.

Michiana registration with Don Dosmann, Lori Schutz, Murray Bartel, Brad Fishburn, and seated is Pat Heller and Beverly Dosmann.

Lori Schutz with Grid Marshal Bill Stevens, Photo Bomb courtesy of Kevin Hennessy Photo by Chip Henderson

On the following evening, September 8th, I was back in Michigan. The Southeast Michigan Region celebrated their 60th Anniversary as a region at the Inn at St John's. What a wonderful, elegant evening – thanks mostly to Patti Door and her team. There was a wonderful display of several Porsches out front, let alone the parking lot full of nearly every Porsche on the road. President Marc Molzon welcomed the crowd of over 150 with kind words for the members and sponsors. Vice President Gretus Hoogestraat welcomed me to the podium to say a few words after our guest speaker -Kim Wolfkill, Editor of Road & Track Magazine.

The following weekend I stopped in at the Mid Ohio Region DE at - where else – Mid Ohio (see photo above). I was on my way to Eastern Buckeye Region's Poker Run on Saturday followed by a dinner at a Classic Diner. Over 25 Porsches participated in the spectacular drive through the small towns and country roads of eastern Ohio.

Cheryl Krum did a fabulous job planning the route, keeping the group together for the complete tour, and incredible door prizes at the dinner. I love when these events draw members from neighboring regions – great to see Northern Ohio members at both of these events.

My next step was Rennsport, more next month on that fun on the left coast with several from Zone 4 and across PCA.

Technical Q and A

By PCA Technical Committee

Taken from PCA Tech Q&A

Edited and Compiled by Mike Valentine

ClutchHow to Diagnose Battery or Charging System – 2002 911 Carrera 4S

Question: A couple of times recently the car has been a little hard to start. Yesterday, parked after a 20min highway drive. Started 45 min later no problem. Drove to the store 10 min away. Couldn't start it again. Click dead battery. Jumpstarted it with another car and it started no problem. I expected voltmeter to show ~14V but it was a little above 13. To make a long story short, how can I make sure the charging system is working properly? What are normal values at idle? Higher RPM? With or without accessories on? Etc...
Thanks in advance!

Answer: Submitted by Bill Burris.

Your experience with occasional hard starting and the easy-to-start condition using a jumper battery is a clear indicator that your current battery is ready for replacement. Occasionally we see problems with the electrical portion of the ignition switch, but your case doesn't point to that as the issue.

With your voltmeter needle at 13+ volts, the charging system is probably just fine. It's not uncommon for older batteries to resist taking a charge, so with a new unit in the battery compartment you may see that number creep up a bit.

There are easy tests for battery condition beginning with a static load test that can be performed at just about any place that sells batteries. Charging system tests are equally easy but you may find that a fresh battery is just what the doctor ordered – no need for additional diagnostics.

LED or Bi-Xenon Headlights – 1997 993

Question: Hello,

I am looking for LED or bi-xenon headlight technology to improve the very poor lighting of the halogen 993 headlights
Is there anything other than the very pricey and older technology Porsche HID retrofit?

Answer: Submitted by Anthony Callas.

I must divulge the fact that I am a Porsche purist at heart and not much a fan of many aftermarket components.
Okay having said that, I have installed many factory genuine Porsche

(Continued on page 18)

(Continued from page 16)

Litronic headlight kits in the 993's and love the installation, it's clean and fits perfect not devaluing the 993 in any fashion.

Try to find a genuine Litronic headlight kit, as you've probably heard before, "The bitterness of poor quality remains long after the sweetness of low price is forgotten" Benjamin Franklin.

Oil Leak – 1983 944

Question: My 944 is leaking a good amount of oil from a bolt located on the lower passenger side of the engine (pictures below). You can see it from under the car and it only leaks when under power. There is a washer behind the bolt. Not sure if there is a gasket or if there's supposed to be. Wondering if anyone knows the purpose of this bolt and/or the best way to go about fixing it.

Answer: Submitted by James Funk.

Your 83 944 was delivered from the factory with a 3-piece Oil Pressure Relief Valve (OPRV). The three parts are a plunger, a spring, and a cap nut. The cap nut also had an aluminum washer, (N 043 815 3, sealing ring 20 X 24). That washer is leaking or is missing.

To fix, remove the cap nut, replace the washer, and replace the cap nut. If you do not remove or disturb the housing that mounts the oil filter, you should be OK.

Screeching Noise – 1999 Boxster

Question: Yesterday I was out for a Sunday drive in the Boxster, top down cruisin with my wife. All is well. after about 100 miles driven and after stopping about 50 miles from home we got in the car to return home. Then it happened. I drove about 1/2 mile and this ungodly screeching was coming from the right front of the car. Never had this before. Pulled over got out and inspected the wheel, brake caliper and under the car and all looked normal. Got back in and drove off and the sound didn't return. Drove home carefully without incident and will be taking it in to my Indie to be looked at. My question here is could this be something with the breaks or something with the radiator fan on that side?

Answer: Submitted by Pedro Bonilla.

The radiator fans are made of plastic and if they make any sound at all it's not what you describe.

Most likely you had a small pebble caught between the front brake rotor and the dust shield. It makes the same sound you describe.

Once you stopped, the pebble got dislodged and you never heard it again.

You probably don't even need to get it looked at if the sound is gone.
